ABSTRACT

This document presents the individual responses of 31 South Carolina senior colleges and universities to a questionnaire on transfer policies. Admissions, housing, and academic policies are covered, as well as policies specific to community college transfers. Intended as a reference tool for students, faculty, and counselors in two-year institutions, it also provides specific data for future study. The questionnaire and a summary statement on the numbers of transfer students to South Carolina colleges is appended. (RT)

PREFACE

This is the first edition of Policies of South Carolina Senior Colleges and Universities Concerning Transfer Students From Two-Year Colleges, 1977. It was modeled after a similar document published by the University of North Carolina (General Administration); we appreciate permission to use the North Carolina format as a basis for the publication. The information contained in this document was compiled and prepared by the Advisory Committee on Transfer Students as part of its report to the South Carolina Postsecondary Education Planning Commission. Members of the Committee and of the Planning Commission are listed in Appendices C and D.

The publication was designed with two purposes in mind. First, it will be useful as a reference tool for students, faculty, and counselors in two-year institutions. Second, it provides specific data as the basis for further study of this important subject.

The policies of the senior institutions, as well as information on the number of transfers among the institutions (Appendix B) were obtained in response to a questionnaire (Appendix A) that was sent to the institutions. Generally, the responses of the institutional representatives who completed the questionnaires were used as submitted. When questions arose, the institutions were contacted for clarification. Institutional policies may be subject to misinterpretation or to change with little notice. We are confident, however, that this publication will be helpful to potential transfer students and their advisors.

APPENDIX B

The following table contains information on the number of transfer students entering South Carolina colleges, universities, university branches, and technical education institutions during the fall semester of 1976. The Committee on Transfer Students was pleased to have obtained a one-hundred percent response to the transfer survey instrument.

The information obtained from the institutions indicates that transfer students make up a sizeable portion of the total student population in the State's postsecondary institutions. Such institutions had a total full-time enrollment of 92,454 and a total headcount enrollment of 124,248 in the fall semester of 1976. Since over 7,000 students transferred into those institutions in the fall semester alone, the total number of students in the institutions who have transferred at least once during their postsecondary studies must be considerably higher than this figure.

Of the 7,205 transfer students entering South Carolina's postsecondary institutions in the fall semester of 1976, 2,760 transferred from out-of-state institutions, 1,666 transferred from public senior institutions, 71 from two-year regional campuses of the University of South Carolina,[1] 1,050 from technical education institutions, 879 from private senior colleges, and 779 from private junior colleges; 3,682 students transferred into public senior institutions, 299 transferred into two-year regional campuses of the University of South Carolina, 1,804 transferred into technical education institutions, 1,218 transferred into private senior colleges, and 202 transferred into private junior colleges.

Note: the table accompanying Appendix B has been deleted due to small size of type.
